

EASYFLOW Z LAUNDER

EasyFlow Z launder is a lightweight FIBRE FREE launder composed of a specific castable with special selected additives, coated with a protective mixture blended with a special additive to ensure a bright, smooth surface.

EasyFlow Z launder optimises life time, insulation, thermal and non-wetting properties for the non-ferrous industry.

Properties

- Excellent non wetting characteristics
- Non wetting to molten aluminium
- Max. temperature 1200°C
- Exceptional thermo-shock resistance
- Low shrinkage
- Very smooth surface
- Retaining its form
- Low density refractory
- Non combustible

Good for environment

- No solvents
- No toxic vapours
- No inflammable vapours
- Cradle to cradle
- Fibre free

Chemical characteristics

Al ₂ O ₃	52 – 60 %
SiO ₂	30 – 40 %
Fe ₂ O ₃	< 0,3%
Others	approx. 10%
